ABOUT SEWING

Difficulty

Intermediate level sewing skill

Embrace the challenges of intermediate level projects that require precision and attention to detail. From mastering advanced sewing techniques like French seams, welt pockets, and bound button-holes to incorporating delicate lacework, pleating, or decorative stitching, you'll enhance the quality and aesthetic appeal of your creations.

Recommended Fabric

Remember to consider the specific design and purpose of the long dress, as some styles may require fabrics with more drape, stretch, or stability. Additionally, take into account personal preferences for texture, color, and pattern to find the perfect fabric that complements the desired style and meets your needs.

Please note that the fabric requirements below apply to fabrics with a width of 140-150cm. It might be necessary to redo the pattern placement for fabrics of different widths and designs (striped, plaid etc). You can avoid any last-minute trips to the store if plan ahead and buy enough fabric for your project.

Seam Allowances

Seam allowances refer to the extra fabric that is added along the edges of pattern pieces to allow for stitching seams together. When you sew two fabric pieces together, the seam allowance provides room for the stitching, strengthens the seam, and prevents the fabric from fraying or unraveling.

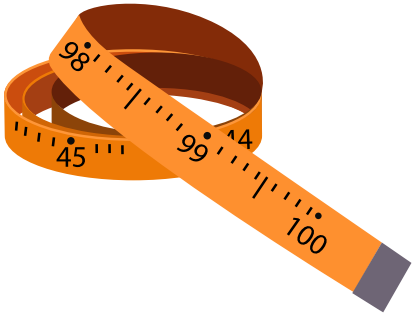

1 CM SIDE JOINING.

2.5 CM HEM SIDE SEWING ALLOWANCE.

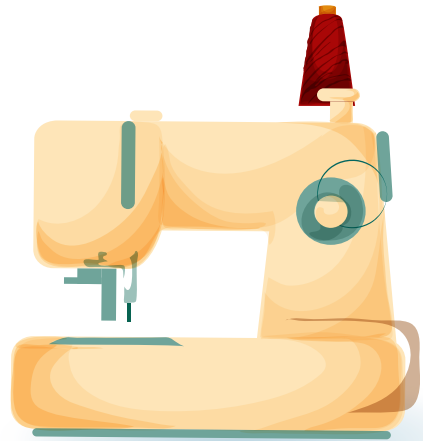

If you have opted for the purchase of a single size in pdf format, the patterns have a double contour, the seam allowances being included. The inner contour is the sewing contour and the outer contour is the cutting contour.

MEASUREMENTS

It is recommended to determine the size by measuring your body, not the clothing size you buy at the store. When measuring, it is best to use a flexible measuring tape. The tape should be just snug enough so it won't slide down. All measurements should be taken level with the ground.

BUST- wrap the tape measure around the fullest part of the chest, under the armpits.

WAIST- wrap the tape measure around the narrowest part of the waist. Typically near the belly button.

HIPS- wrap the tape measure around the fullest part of the hips/buttocks area.

HEIGHT - top of the head to the floor

SIZE FINDING,FABRIC GRAIN,PATTERN CUTTING

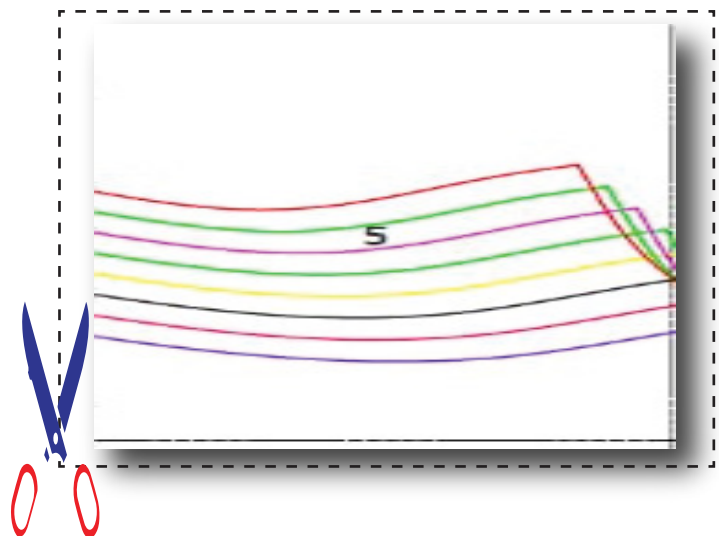

Select your size
from pdf layers

These arrows on your pattern pieces indicate your grainline, which you should align with the grain of your fabric prior to cutting. Haven't seen the second arrow before? It indicates you need to fold your fabric along the grain then cut. You see this arrow on half pattern pieces that are cut on the fold. Don't know what grainline or grain is? Let us explain. When fabric is made it is woven with threads that go in two different directions. Lengthwise, which spans the cut edges and crosswise, which spans the selvedge edges (the selvedge is the band of fabric that runs up either side). The lengthwise direction is the grain of your fabric and what you use to line up your grainline.

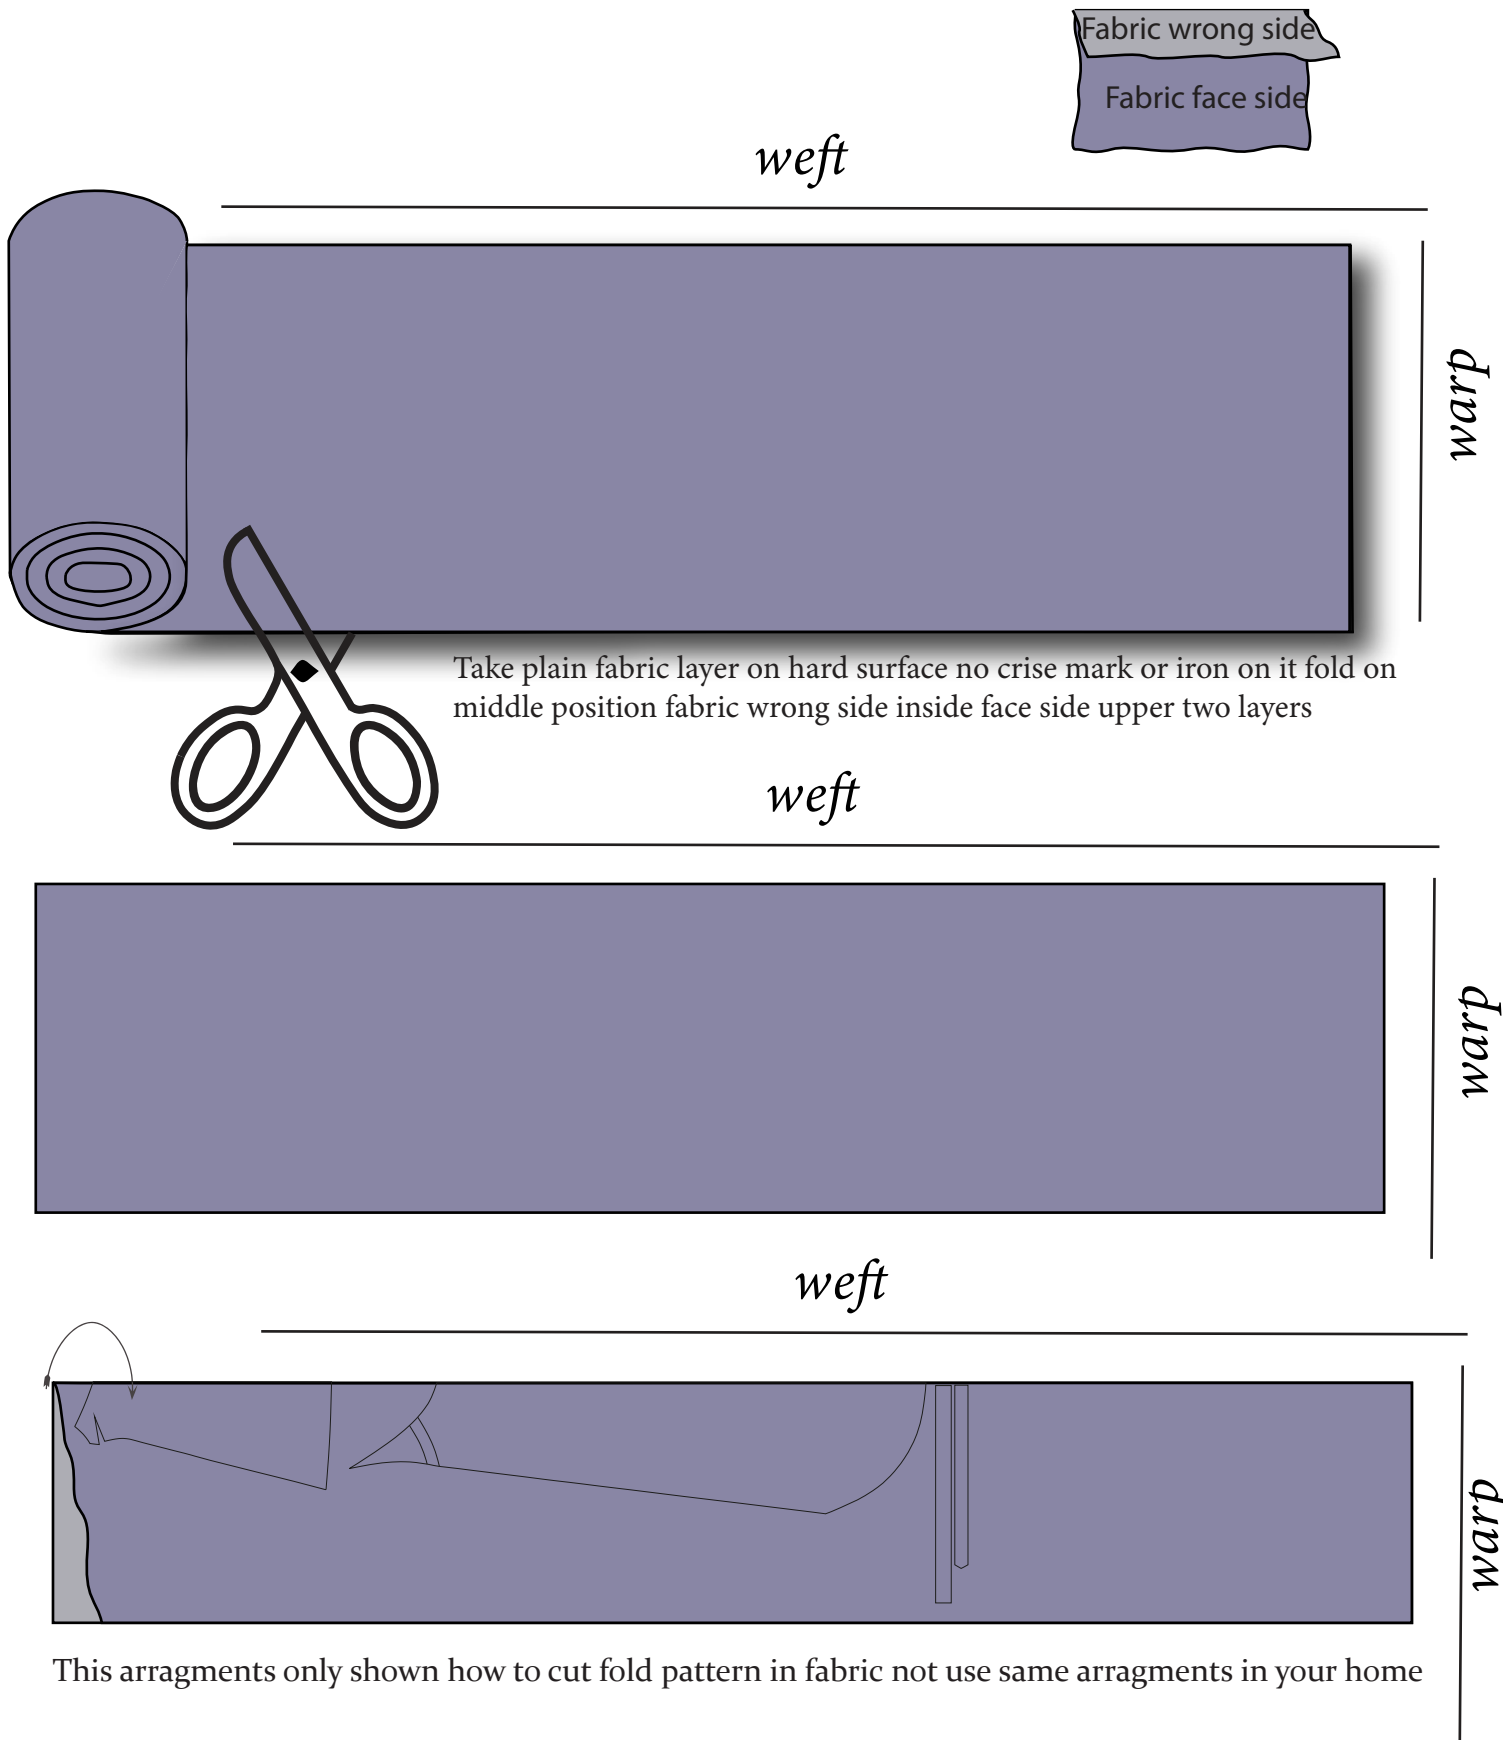

All of the Fashion sewings have a border setting so you can print our patterns on any printer, cut out the outlines (see scheme to your right) and tape them together Pattern is in real size just make sure to set printer at 100% scale or real size when printing.

You have 3 printing options available: A4 size, Letter Size, A0 file You can print our patterns at home if you have a printer or send them to the online/ local printing shop. Ensure you print at actual size (100% scale). Verify that the print out size is correct by measuring the 5-centimeter scale on the pattern "using a ruler" Align all pages and tape them together using clear tape and cut out your size.

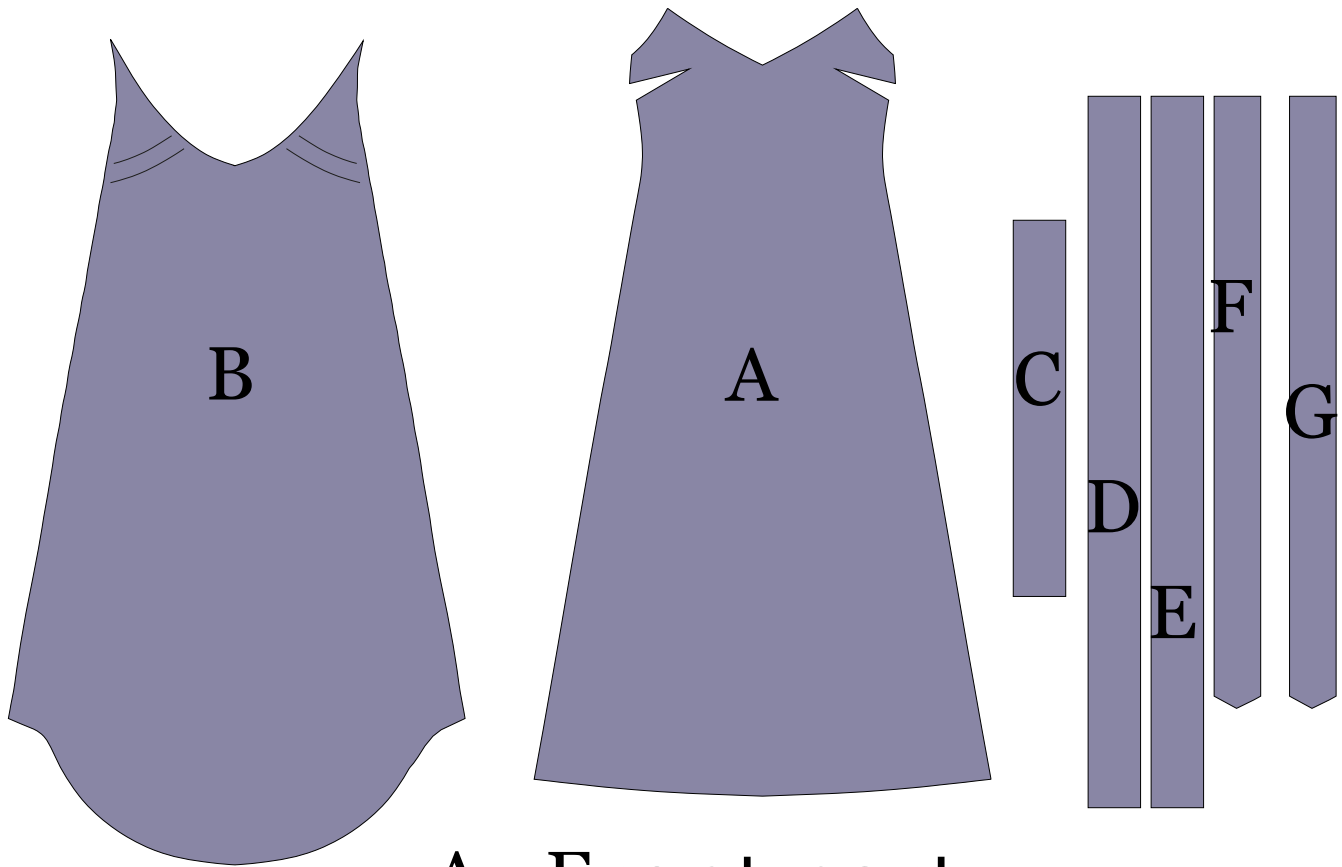

FABRIC CUTTING

This arragments only shown how to cut fold pattern in fabric not use same arragments in your home

ALL SEWING PIECES

A=Front part

B=Back part

C=Waist belt

D=Left back part

E=Right back part

F=Front neck left part

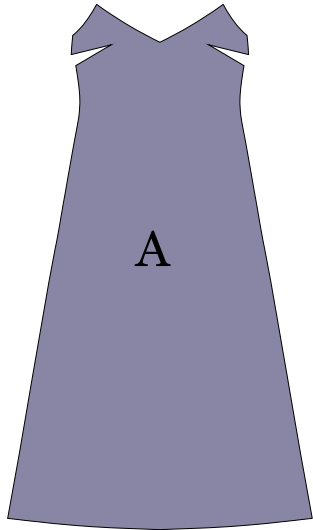

G=Front neck right part

This dress have so many parts that why we will give a alphabetical name for every parts it will be easy for sewing.

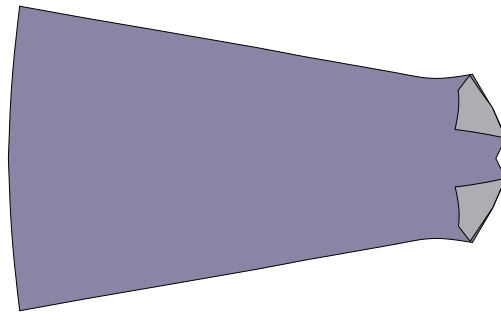

SEWING INSTRUCTION

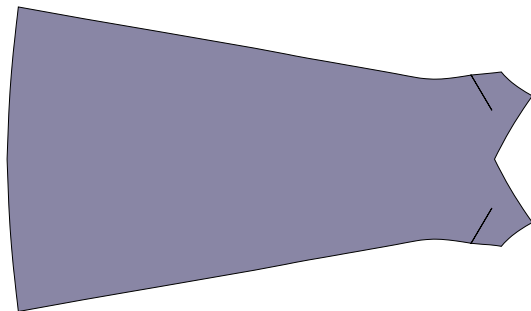

FRONT PART MAKING: STEP 1

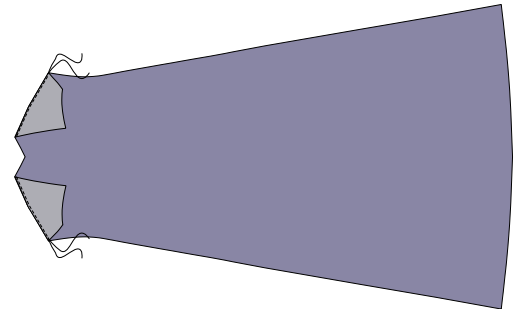

- 1.1 Take the front part (A) Front part have both side dart & front part bottom edge area have hemming 2 cm lest start sewing

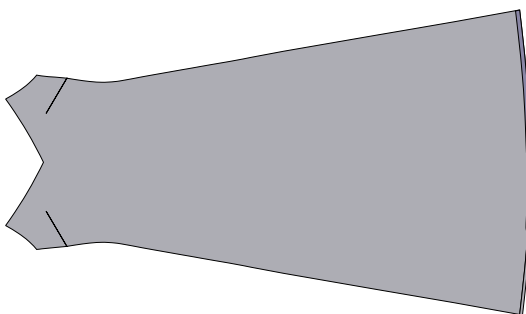

- 1.2 Fold the top dart line front to back side & align the the cut area line for sewing

- 1.3 Sewing at the neck start to cut edge area

- 1.4 Now turn at right side & press sewing area for fix at the right area

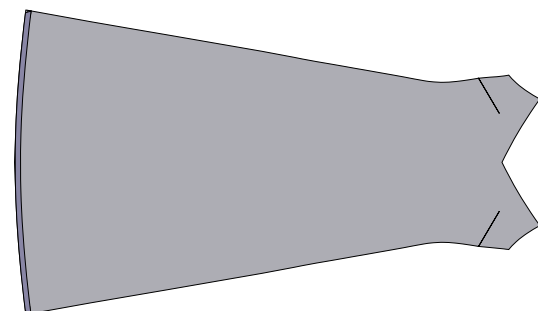

- 1.5 The front bottom area, a 2cm hemming is applied with a two-fold technique. The first fold is utilized for the purpose of fabric raw edge finishing, while the second fold is positioned above the first fold, ensuring a neat and durable hemming finish.

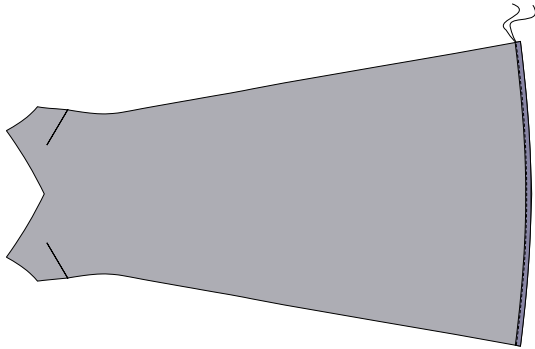

- 1.6 Also you can use this types sewing machine passer foot

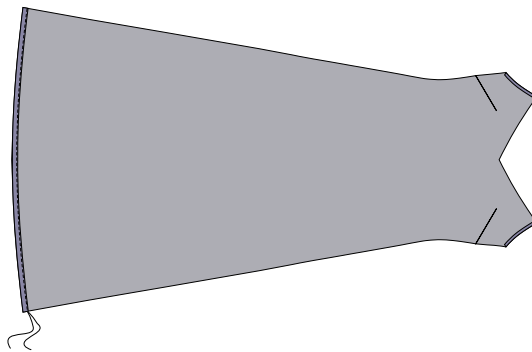

- 1.7 After folding press with hot iron for sewing perfectly

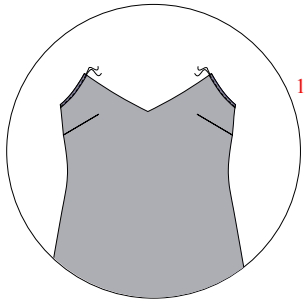

SEWING INSTRUCTION

1.8 After sewing cut the all extra sewing threads

1.9 In addition, hemming is applied to the armhole area with precision. A 1 cm hem is created, with a two-fold approach. The initial 0.5 cm fold serves to address the raw fabric edge, while the subsequent 0.5 cm fold is positioned above the first, ensuring a secure and aesthetically pleasing finish

1.10 After folding do stitching at the both armhole area & press with hot iron

PLACKET MAKING: STEP 2

2.1 Front neck have placket take the plackets (F) & (G) this not only use for placket it will be also use for shoulder belt

2.2 both side have 1 cm sewing allowances need to fold fabric right side to wrong side then press the hot iron for fix the fold at right place

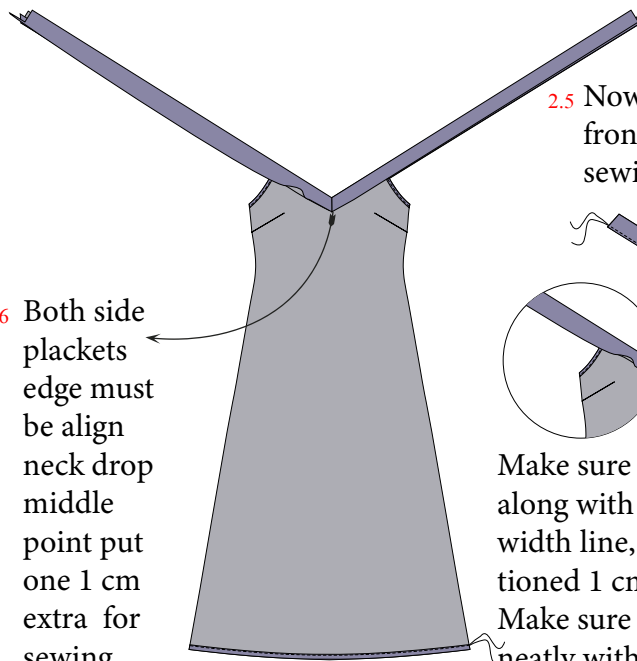

2.3 Now fold at the middle area line align the edge to edge

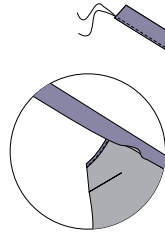

2.4 Follow the same process for both plackets part

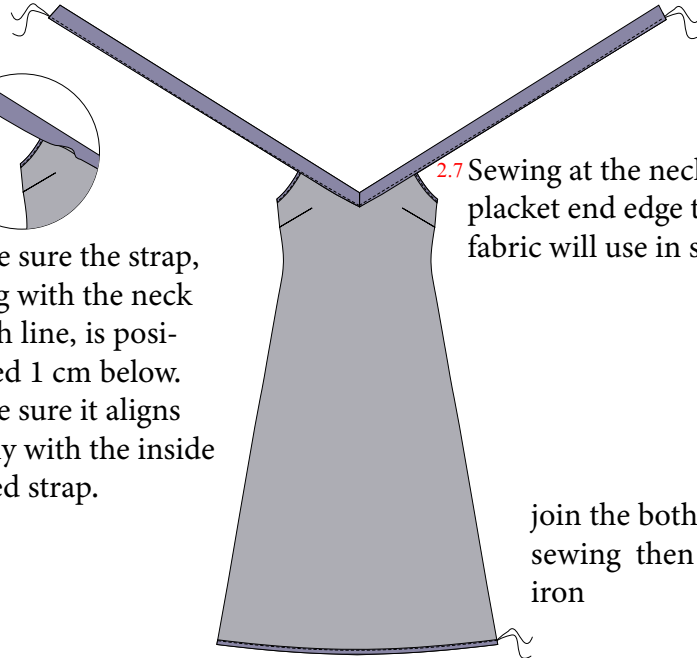

SEWING INSTRUCTION

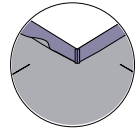

2.5 Now insert the plackets middle gap must be inside the front part top edge area 1cm after placing proceed for sewing

Make sure the strap, along with the neck width line, is positioned 1 cm below. Make sure it aligns neatly with the inside folded strap.

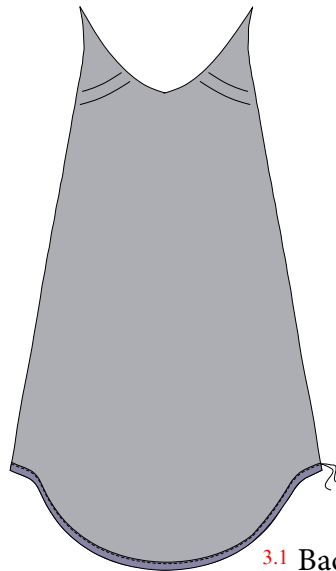

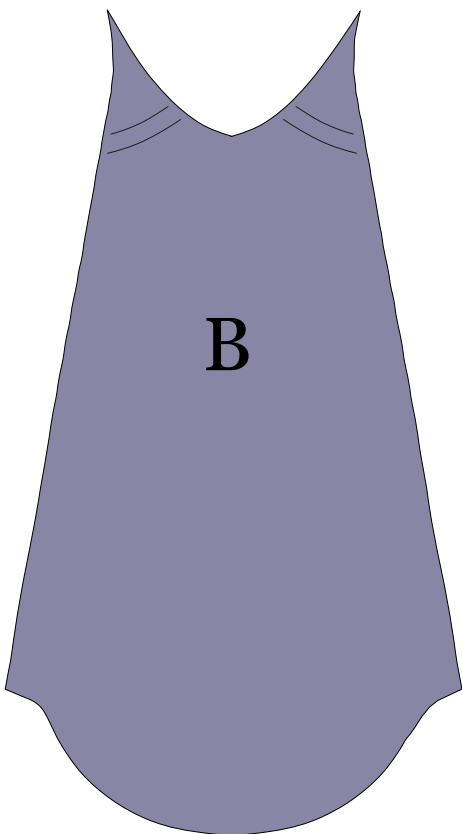

2.7 Sewing at the neck drop point to placket end edge this extra plackets fabric will use in shoulder strap

join the both strape edge witgh sewing then press with hot iron

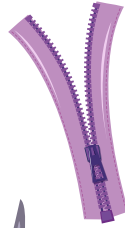

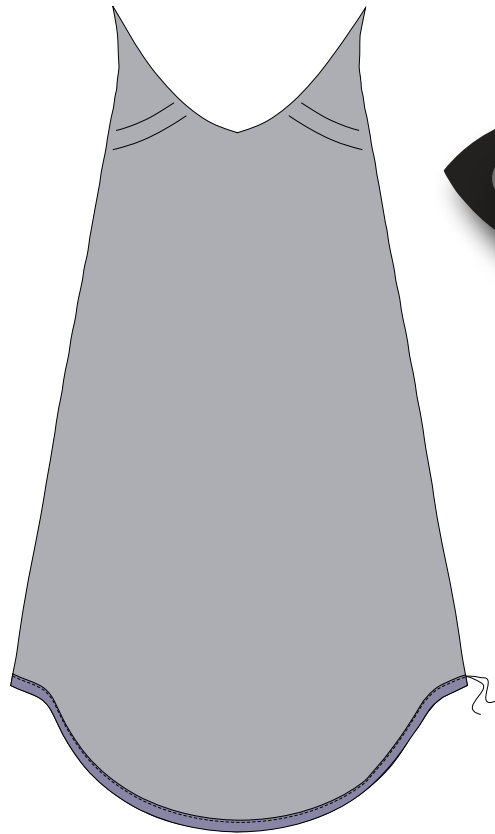

BACK PART MAKING: STEP 3

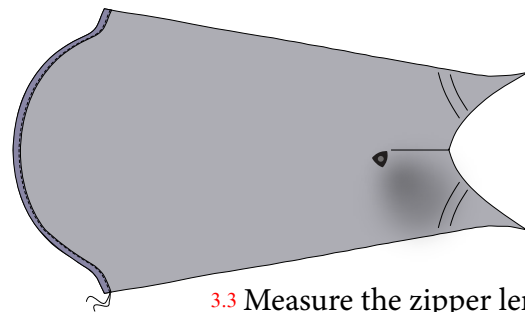

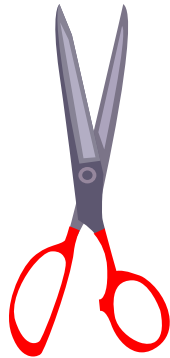

3.1 Back part lower edge have hemming please follow the front part hemming process for making back part hemming

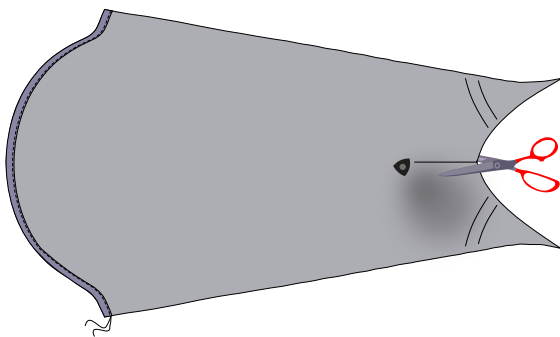

SEWING INSTRUCTION

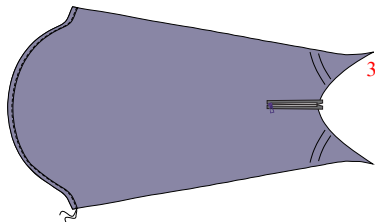

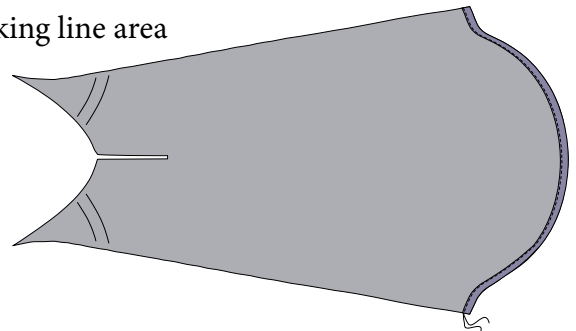

3.2 Back part have a zipper so take the back part chalk scissor

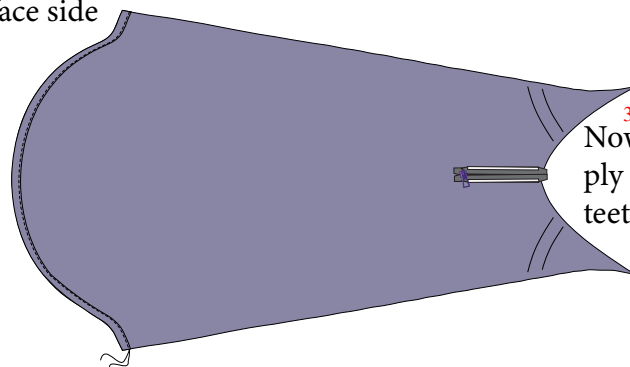

3.3 Measure the zipper length, then mark the back part top edge middle area to zipper length

3.4 Cut the marking line area

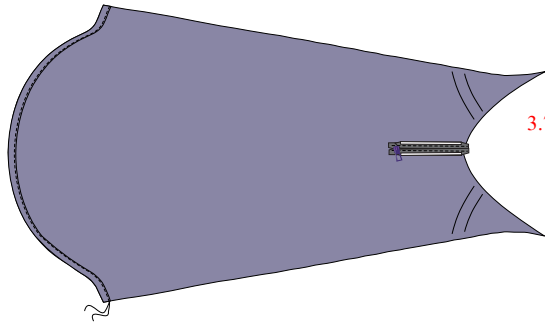

3.5 Now turn the back part fabric wrong side to fabric right side unzip the zipper & place the back part cutting line
Must be zipper face side

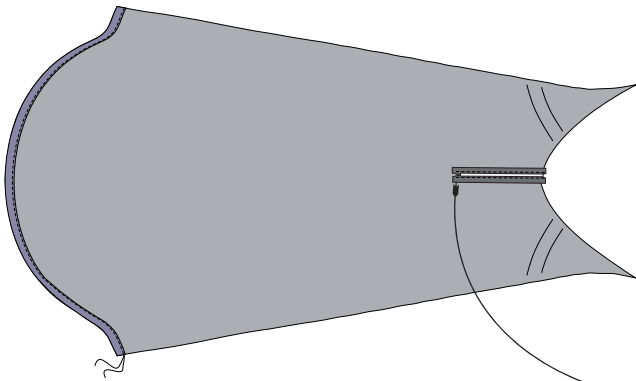

3.6 Now twist the both zipper ply & place zipper both ply teeth oposite direction

SEWING INSTRUCTION

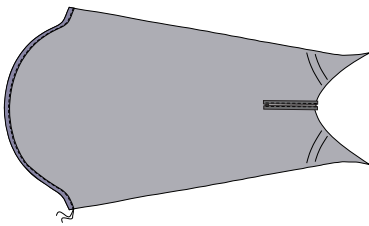

3.7 Now sewing at the zipper ply fabric side top to zipper puller line, not sewing after zipper puller

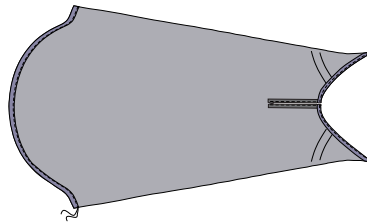

3.8 Please ensure that when working with the zipper, the fabric's wrong side should be positioned facing outward through the back part of the zipper. Do not allow the zipper puller to pass through; it must always be oriented with the fabric's right side. This practice will help maintain a neat and professional appearance in your project

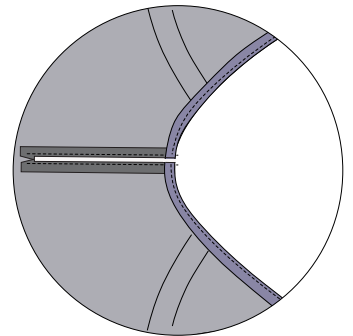

3.9 Now ssewing the zipper edeg fabric area

3.10 Back part top edge have 1cm hemming

3.11 Divided 1 cm .5cm for raw edge folding
second .5cm fold must be upside of first fold

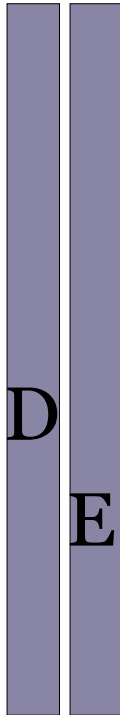

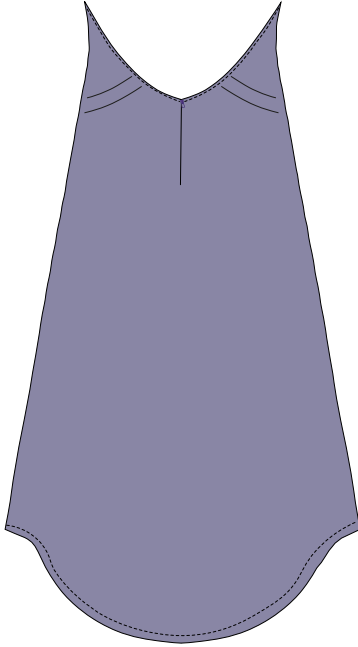

3.12 After two folding then sewing ,zipper edge put inside the folding & sew

SEWING INSTRUCTION

BACK BELT MAKING: STEP 4

- 4.1 Back side also have two belt which is joining at waist line to armhole edge area
take the belt (D) & (E) for folding

- 4.2 Turn 1cm fabric right side to fabric wrong side
press with hot iron for fix at right place

- 4.3 Fold at middle of belt area align
both fold edge in one line

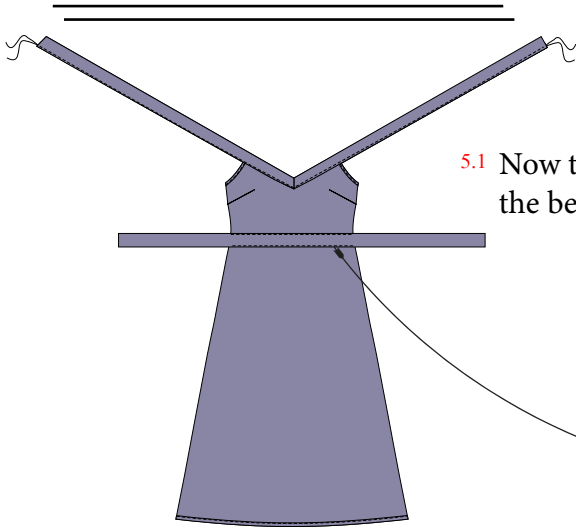

Follow the same process for both belt

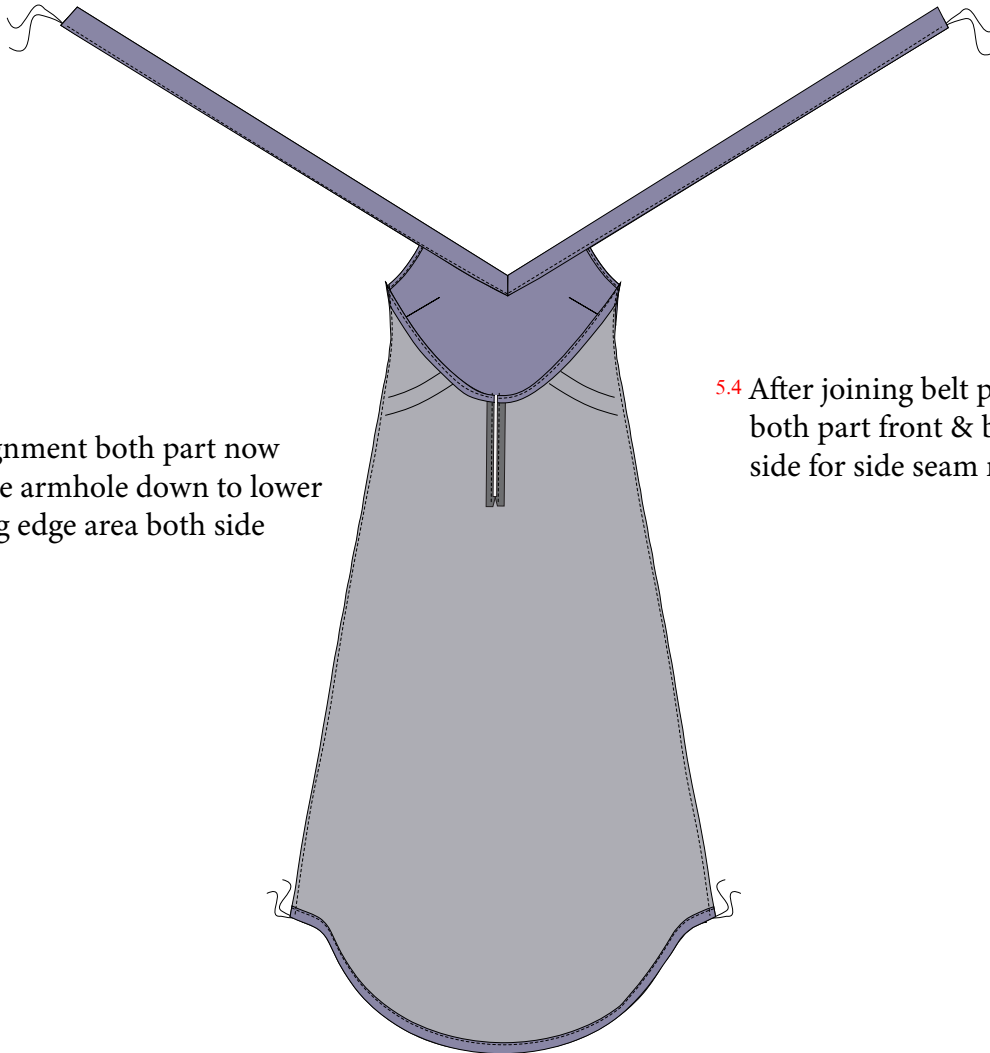

SEWING INSTRUCTION

ALL BELT JOINING: STEP 5

5.1 Now take the front part at fabric right side align the belt at the waist line, belt must be flat

5.2 After placing at the right place belt now sewing at the belt both side edge area

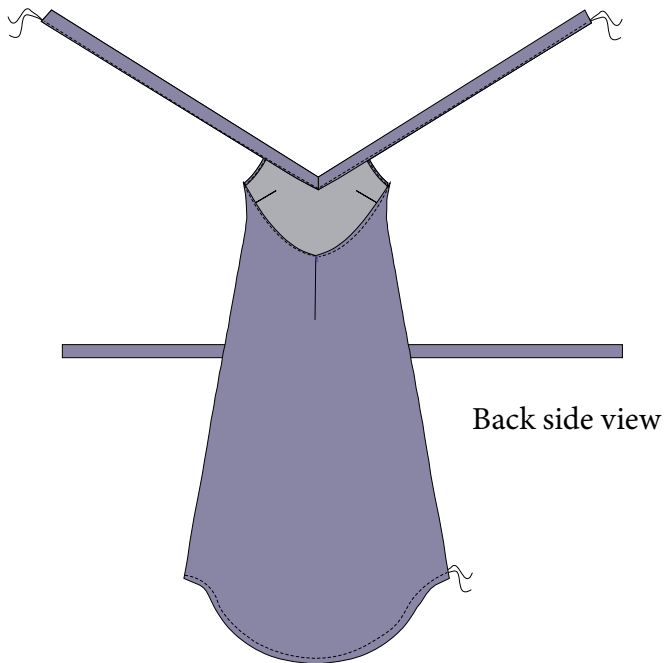

5.3 After alignment both part now sew at the armhole down to lower hemming edge area both side

5.4 After joining belt part now align the both part front & back at same fabric side for side seam making

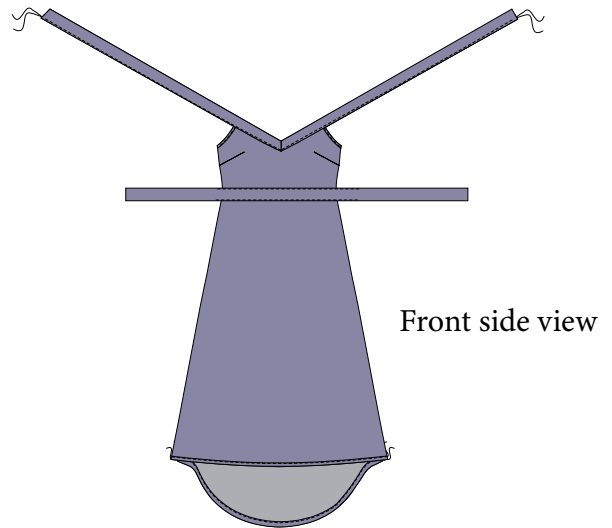

SEWING INSTRUCTION

Back side view

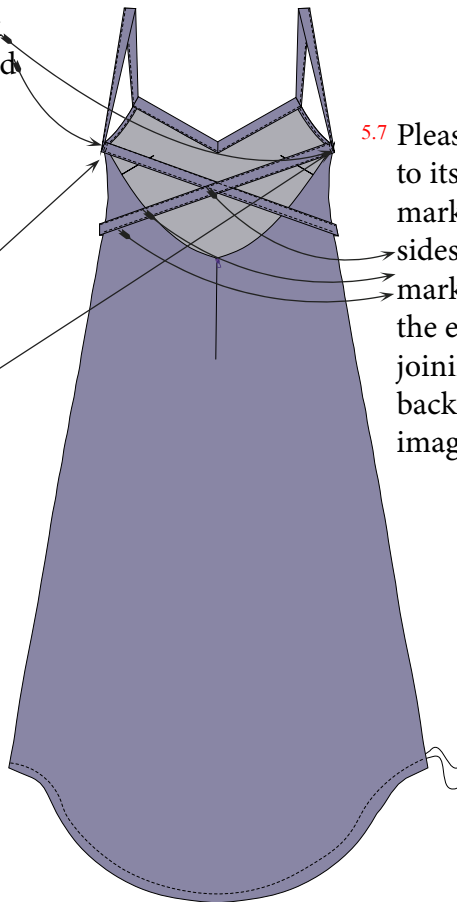

5.5 After side joining turn the dress fabric wrong side to fabric right side

Front side view

5.6 Now turn the front palckets back side & join back part armhole end edge area

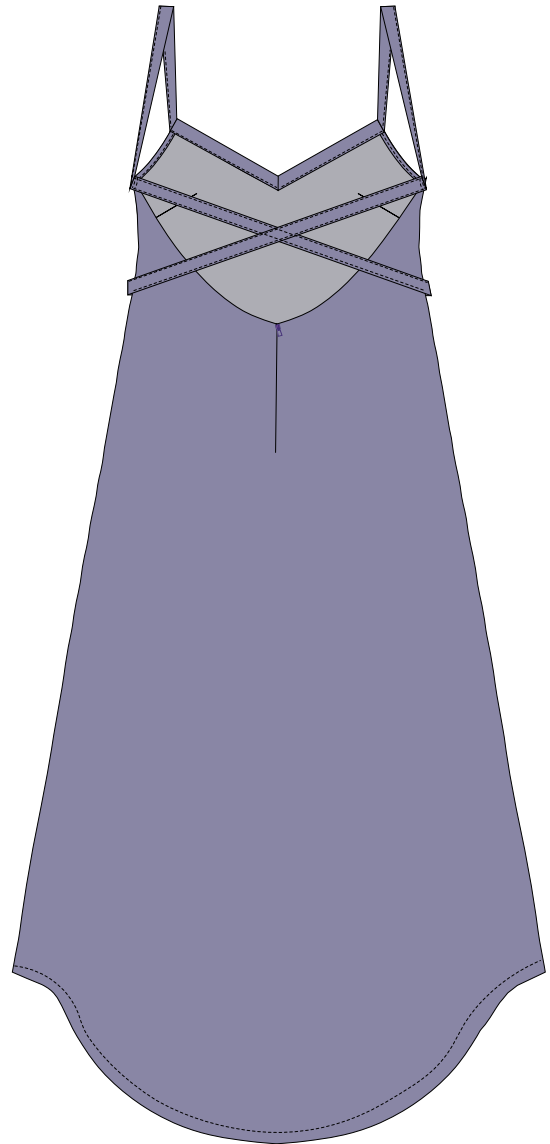

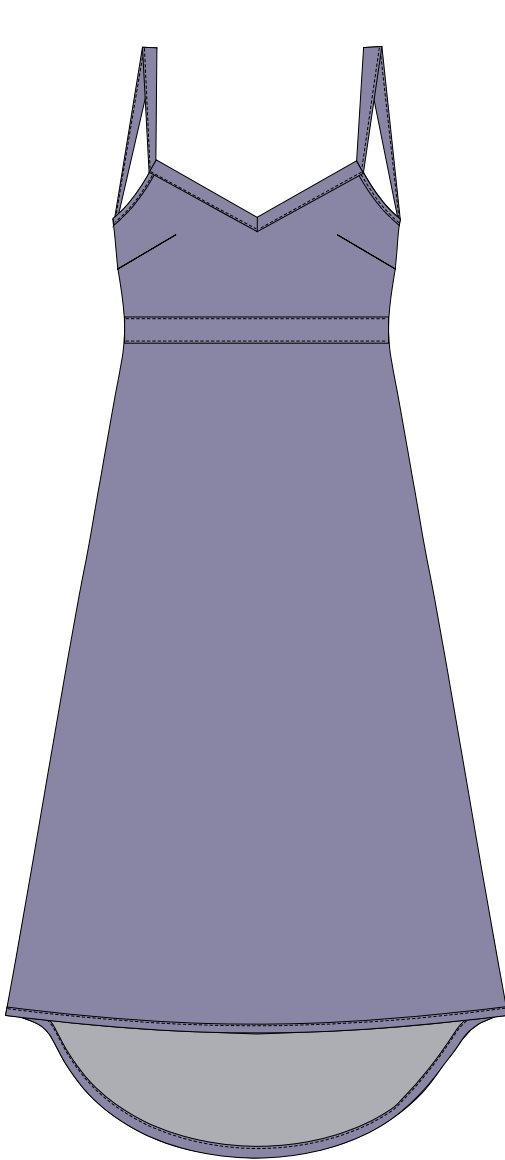

5.8 Also join back belt edge same area of shoulder belt joining area

5.7 Please proceed by turning the front joining belt to its back side, making sure to align it with the marked area for belt joining. Ensure that both sides of the belt are accurately aligned with the marked area, and proceed to stitch the belt at the end section. It's important to note that the joining of both belts should be confined to the back part area, in accordance with the provided image for reference.
